

PI Softshell »

PI Softshell »

Your corporate logo shown on your softshell clothing? More and more companies use softshell jackets, since they are warm and comfortable to wear. They can withstand a little rain, are wind resistant and on top of that they are super lightweight.

Specifically for your softshell apparel, Polygraphic has developed PI Softshell. It is a high-quality transfer: perfect adhesion on this specific fabric, with light stretchability, comfortable to wear and above all very high protection against bleeding of the fabric. This transfer is also suitable for polos, sweaters and T-shirts.

We offer you our PI Softshell in two Premium variants:

- PI Softshell Black Outline : for your black fabrics
- PI Softshell : for all other colours

PI Softshell can be sealed at relatively low temperature. This is of importance as softshell fabrics are made of synthetic materials.

The transfer is washable up to 60 degrees and will be delivered according to our standard delivery terms. The minimum order quantity is 25 pieces.

Corporate Identity has become increasingly important for companies. Also for a corporate logo on your softshell clothing you can turn to us for a transfer of top-quality!
